Assessment 2
Analysis
Create initial class diagram
List all deliverables for the demo
Link associates list plan and testing results
Link user manual
Record progress and feedback
Recommendations and report
Write the statement of requirements
Re-Link deliverables list
Data hard-wired into implementation
Refine solution and planning
Hard-wiring testing methods and approaches
Design
Data input on the at-most tests
Implementation of the GUI interface
Explore an automated code profiler
Design
Updated statement of requirements
+ Explain any departures the analysis
Architect, show outline
Implementation and report
+ Include summary of changes made
Write associated and mitigations plan
Update statement of requirements
+ Explain changes made to the statement
Self-assessment tasks (optional)
Assessment 3
Project Presentation
Present team project
Project Report
Research why need to progress
Develop and submit the project chosen
Testing
List all deliverables in deliverables
Link associates for the demo
Link associates list plan and testing results
Link user manual
Design report
Design and implement interface to change management
Provide explanation and justification of changes
+ The testing report
Implementation and report
Re-Link deliverables list
Update statement of requirements for requirements
Self-assessment tasks (optional)
Assessment 4
Evaluation and Submission
Explain the approach to evaluation and testing
Assessment how the project meets the requirements
Implementation and report
Re-Link deliverables list
Hard-wiring, modifications to software
Implementation and report
Hard-wiring, testing and more
Hard-wiring, discussion on methods and tools
Self-assessment tasks (optional)
